

GREAT NECK SOUTH HIGH SCHOOL
MATHEMATICS DEPARTMENT

All freshmen are required to purchase their own graphing calculator. There are two different calculators that are used in all regents classes. Only ONE of them needs to be purchased; the CX is a color calculator with a rechargeable battery and the Touchpad is a black and white calculator which runs on 4 AAA batteries. There is a picture of each type below for your convenience.

Please note a TI Nspire CAS is NOT allowed to be used in regents level classes, when purchasing your child's calculator please make sure it is NOT the CAS model.

If you have any questions, feel free to contact the Math Department Head, Neel Chugh, by email at nchugh@greatneck.k12.ny.us.
